Experience

Royal Bank Of Canada   Jan - August 2019, May - August 2020
Junior IT Analyst
- Worked as part of an agile team on multiple .NET solutions for members of the RBC compliance team.
- Configured pipeline tools such as Jenkins and automated tests
- Designed, developed, and maintained multiple applications.
- Regularly met with clients to gather business requirements and feedback.

Cubic Health Inc   May - August 2018
Junior .NET Developer
- Created a public facing application that would allow clients to quickly check what pharmaceuticals their health plan would cover.
- Acted as administrator for Windows and Microsoft SQL servers.
- Communicated with coworkers to maintain a list of project requirements that changed frequently.
- Developed using .NET core, Microsoft SQL, and React.

Cubic Health Inc   May - August 2017
.NET Development Intern
- Worked with a supervisor to port existing desktop applications into internal web applications.
- Created internal web applications for the pharmacy team that integrated with REST APIs, SQL databases, and data analytics tools.
- Created documentation for new business processes
- Developed in NodeJs, .NET core, Microsoft SQL, and React

Royal Bank Of Canada   May - August 2016
Data Analyst Summer Student - Project Flashpoint
- Created a web application that assisted in data hygiene for the Security Operations center at RBC.
- Merged data from various sources into a single app that provided team members with both predictive and descriptive analytics.
- Developed in NodeJS, Microsoft SQL, and Angular.
